Appurity Mobile Threat Prevention

See it and stop it on any device. Even on zero-day.

Intelligent protection for the mobile, agile business

Some days, it can feel like the wild west out there. No matter how you design and implement your security policies, something, or someone, finds their way through.

And in these days of BYOD and COPE, there's always that nagging doubt that some user or other is going to leave a back door open, or even jailbreak their device, with the inevitable disastrous consequences.

Appurity Mobile Threat Prevention brings together the industry's leading mobile and network security vendors to provide a comprehensive blend of complementary solutions. Our expertise and experience will help you deploy this suite of intelligent security technologies in alignment with the way you do business.

Your users can work freely with their preferred devices, while your network and assets enjoy layers of intuitive protection that can even prevent zero-day attacks.

Triple lock peace of mind

Three proven solutions form the core of Appurity's Mobile Threat Prevention solution.

- Integration with existing mobile management solutions
- Purpose-built solutions for highly mobile, multi-platform environments
- Reduced risk of compromise and data loss
- Less downtime, less requirement for costly and disruptive remedial work
- Supports compliance with industry and government regulatory regimes

Lookout
Closes your security gap as your data goes mobile

Cylance
Prevents attacks, with zero reliance on signatures, the cloud, or reputation lookups.

MobileIron
Mobile threat detection and remediation, on-device.
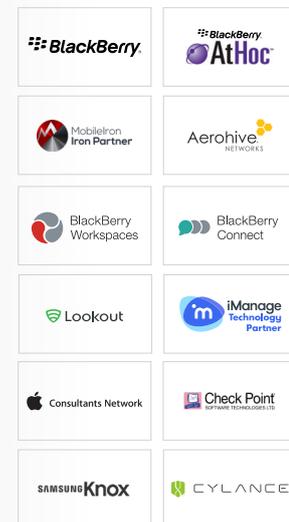

Proven partners

Appurity has years of experience in the design, deployment, management and support of IT infrastructures. We also offer specialist expertise in infrastructure security, application and server optimisation, network audits, regulatory compliance and additional services. Partnering with us means you can get more done and focus on the successful implementation of strategic projects.

See it and stop it on any device. Even on zero-day.

appurity

Artificial intelligence to block real threats

This is security designed and optimised for today's highly mobile and agile businesses. It uses AI and advanced algorithms to think ahead of the most sophisticated attackers, blocking zero-day attacks and reducing the risk of harmful reputational damage and costly reactive repairs.

CylancePROTECT - Proactive, preventive, AI-driven protection
- Uses AI, not signatures, to stop known and unknown malware from running on endpoints
- Prevents common and unknown (zero-day) threats with no need for a cloud connection
- Continuous endpoint protection without disrupting end-users

Lookout Mobile Endpoint Security -
Extends security policies to mobile devices
- Identifies app-based mobile threats like Malware
- Finds network- and device-based threats
- Discovers web and content-based threats such as Phishing attacks

MobileIron Threat Defense -
A multi-layered approach to detecting, assessing, and mitigating threats
- Advanced threat detection and classification for iOS and Android
- Adaptive risk mitigation to keep data and assets safe
- Vulnerability assessments to reduce risk and support compliance

How can Appurity help?

Appurity is assisting businesses with their mobility strategy, whether COBO (Corporate Owned, Business Only), COPE (Corporate Owned, Personal Enabled), or BYOD (Bring Your Own Device) .

With Appurity Professional Services we are helping customers in the following areas:

> Working with the customer, we will examine the use cases, help define the requirements and objectives and assist with the project roll-out.

> We can configure and build the UEM, create the profiles and policies based on business mobility management criteria.

> Device and system management: device performance measurement, device health diagnostics, connection optimisation and security.

> Application and messaging management: security and distribution for practice messaging systems and mobile applications, as well as all maintenance.

> We are advising customers on their mobility and app strategy with solutions that conform to regulatory or security guidelines, such as NCSC Guidelines, PSN for COBO, COPE and/or BYOD.

"Working with Appurity gave us a more strategic approach."

Senior Project Manager, Greater London Authority

"Appurity was the ideal partner to help keep us in line with government guidelines on data security."

Senior Consultant, Surrey County Council

Your organisation deserves the **leader** in Mobile Threat Prevention
